9540			11.87		M	D			

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

[illegible]

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Total Habitat Cover	100

Other Site Characteristics

Tipica montagna insulare mediterranea comprendente diversi orizzonti di vegetazione. Versanti occidentali e meridionali maggiormente degradati dall'azione del fuoco, con predominanza di flora terofitica. Versante settentrionale più temperato, parzialmente interessato da colture agrarie, conserva le principali formazioni forestali dell'isola.

4.2 Quality and importance

Sito notevolmente rappresentativo dell'aricca flora elbana, presenta specie rare ed endemiche, perlopiù di provenienza sardo-corsa, ma anche specie esclusive come *Limonium ilvae*. Presenza di rare specie ornitiche nidificanti marine e terrestri, legate all'ambiente rupicolo (*Falco peregrinus*), alle garighe mediterranee (*Sylva sarda*, *Sylva conspicillata*, *Serinus citrinella corsicana*) e alle alte quote (*Monticola saxatilis*, *Prunella collaris*). Unico sito toscano con popolazione autoctona di *Alectoris rufa*. Presenza, tra i Rettili, del *Phyllodactylus europaeus*, specie endemica dell'area mediterranea occidentale appartenente a un genere per il resto a distribuzione tropicale e tra fli Anfibi della specie *Hyla sarda* (endemica di Elba, Corsica e Capraia). Presenza di numerose specie di invertebrati endemici.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
