4.1 General site character

Habitat class	% Cover

Other Site Characteristics

Piccole zone umide di origine in parte artificiale, residui delle ben più vaste paludi preesistenti.

4.2 Quality and importance

A Suese sono presenti cospicui popolamenti di rizofite e pleustofite di un certo interesse, ma l'interesse del sito è dovuto soprattutto all'avifauna. Da segnalare innanzitutto la nidificazione di specie rare e minacciate come alcuni ardeidi (di grande rilievo è Botaurus stellaris), Circus aeruginosus, Acrocephalus melanopogon e Locustella luscinioides; notevole è anche l'importanza per la sosta dei migratori (sono molto frequenti gli avvistamenti di specie rare) e per lo svernamento di molte specie di uccelli acquatici.
